

FOR IMMEDIATE RELEASE**OakGate Technology Provides Advanced NVMe Test Technology to University of New Hampshire Inter Operability Lab (UNH-IOL) as a Contributing Member**

OakGate test appliances lay the groundwork for expanding UNH-IOL's NVMe Test Program

Loomis, California, August 6, 2016 — OakGate Technology, the industry leader in advanced, high-performance test solutions for flash storage, announced that it is now a contributing member in the NVMe consortium at The University of New Hampshire Interoperability Lab (UNH-IOL). In that capacity, OakGate has already provided test tools for advanced NVMe functionality such as Reservations and Namespace Management that are targeted for use in future NVMe Plugfest testing specifications.

“OakGate Technology has been providing cutting edge test solutions for NVMe flash storage and has delivered test tools with the industry’s most advanced NVMe 1.2 features. We are pleased that some of the key NVMe capabilities that our customers are building into their products using OakGate test appliances will be available through the IOL’s NVMe Interoperability test infrastructure,” said Robert Otis, Director of Technical Sales at OakGate. “The UNH-IOL is a recognized leader in conformance and interop testing for NVMe hosts and devices. Now our customers can use OakGate test solutions to ensure that their products are ready to meet the requirements of future NVMe Plugfest Testing specifications” added Mr. Otis.

"We are pleased to welcome OakGate Technology as a contributor to the UNH-IOL", stated David Woolf, Senior Engineer for Datacenter Technologies, at UNH-IOL. "It's been a privilege to work with the NVMe organization in building a test program for conformance and interop testing. Having contributions from OakGate will enable us to expand the test capability even further" added Mr. Woolf.

OakGate will be participating in the 2016 Flash Memory Summit being held at the Santa Clara Convention Center in Santa Clara, CA from August 9 through 11. Please visit OakGate’s booth #815 for further information.

About OakGate Technology

OakGate Technology Inc. (www.oakgatetech.com) is a leading provider of test, validation, and benchmarking test platform to the storage industry. The privately held company is a recognized leader in test and validation tools for solid state storage. OakGate's highly-capable and flexible platforms support all popular storage protocols and are based on advanced, proprietary software, and industry standard hardware. OakGate's products have been deployed by top tier components suppliers, drive manufacturers, and storage system OEMs worldwide. Based in Loomis, California, OakGate Technology was founded in 2008 by industry veterans from storage and server industries.

About the UNH-IOL

Founded in 1988, the UNH-IOL provides independent, broad-based interoperability and standards conformance testing for data, telecommunications and storage networking products and technologies. Combining extensive staff experience, standards-bodies participation and a 28,000+ square foot facility, the UNH-IOL helps companies efficiently and cost effectively deliver products to the market. www.iol.unh.edu.
