

## **Experienced Software Engineer**

Posted 10/31/2017

OakGate Technology is a leading provider of test, validation, and benchmarking products and services to the storage industry. The company has established a clear leadership position as a preferred supplier of test and validation tools for solid state storage, including SSDs. OakGate was founded by seasoned industry veterans with a proven track record in developing key storage and server technologies.

### **Position**

Experienced software engineer with a strong background in object-oriented design and a passion for elegant code and architecture. You will join a team of engineers dedicated to the craft of making quality software and striving to push the boundaries of storage test-focused enterprise applications.

### **Responsibilities**

- Enhance the experience of end users by creating intuitive, easy-to-use software features that add value to our products
- Increase team productivity by creating and maintaining clean, easy-to-understand code
- Architect and implement new application and test features to facilitate the testing of storage I/O, networking, and fabric protocols
- Participate in the user interface (UI) and user experience (UX) design processes
- Create unit and functional tests for newly- implemented features
- Implement feature requests based on thorough investigation, bug reports, team discussions, planning, architecture, testing, and reviews

### **Requirements**

- B.S. in Computer Science, Software Engineering, Computer Engineering, or equivalent
- Minimum of five years of experience in software development
- Strong desire to create quality and elegant software
- Solid knowledge of Java and object-oriented design principles
- Experience in multi-threaded and network-based application environments
- Great people skills – let's learn and have fun together creating the best software solutions possible

### **Desired Attributes**

- General knowledge of working with technology specifications
- Experience with storage protocols, such as NVMe, SAS, SATA, and Fibre Channel
- Experience with UI design and implementation (preferably JavaFX and Swing)
- Familiarity with protocol analyzers

## CAREER POSTING

---

- Familiarity with Linux/Unix
- Experience in Python scripting
- Experience with driver development in C
