

Come See the Cutting-edge Storage Validation and Analytics Solutions from OakGate Technology at the 2019 Flash Memory Summit, Booth #807/809

Loomis, California, August 2, 2019 – OakGate Technology, the world-leader in storage validation and analytic solutions, will demonstrate industry leading products and technologies at the Flash Memory Summit in Santa Clara, CA from August 6-8, 2019. You are invited to visit our booth #807/809 and explore our products, discuss your needs, and chat about our industry.

This past year was yet another record year for OakGate! Thank you for making us the #1 validation platform for solid state storage! Based on our experience serving a diverse set of customers, our deep understanding of their requirements, and our knowledge of industry best practices, OakGate continues to provide innovative storage solutions. We are also leading the transition to PCIe Gen4 solutions, as demonstrated by our latest products in our booth.

Many of our customers are now ramping up volumes and are looking for a seamless solution for quality, reliability and production testing. The Epic family of testers, from OakGate and our partner Daichu, offers a perfect solution. The Epic testers incorporate temperature-controlled chambers and run OakGate's SVF Pro software suite.

Here is the most exciting news – we will be showcasing *WorkloadIntelligence*[™], an advanced software solution for data center workload analysis and replay. Get ready to learn more about this breakthrough technology that will change how data center infrastructure and storage devices are optimized.

Lastly, check out two intriguing presentations, delivered by Bob Weisickle, OakGate's Co-Founder/ Strategy & Technology Officer:

- Memory Fencing for Detection of DMA Memory Address Violations
- Optimizing SSD Performance Efficiently with Realistic Workloads

Location: Test-201-1: Testing/Performance Analysis track

Day: Wednesday, August 7

Time: 8:30am to 10:30am

In summary, whether you are an SSD supplier, a hyperscale data center, a storage system provider or a controller chip vendor this is what you will see from Oakgate at FMS:

- Next generation U.2 SSDs running in OakGate's popular E-Series 12-Bay U.2 Enclosure supporting PCIe Gen4
- OakGate's new 12-Bay EDSFF Enclosure running EDSFF SSDs, preferred by data centers
- The industry's most widely used test software, OakGate's fourth-generation storage validation framework (SVF Pro) with Enduro
- A sneak peek of our new *WorkloadIntelligence*[™], an innovative workload analytics and replay technology for hyperscale data centers and SSD suppliers

Thanks again for your support over the past year. We look forward to seeing you at the 2019 Flash Memory Summit, August 6–8, at the Santa Clara convention center, booth #807/809!
